Hello everyone, I am the developer of the game "One More Step". Though there aren't sufficient resources, I developed the game alone out of interest. Since launched, the game has received support from many enthusiastic players, and their active feedbacks have helped me correct many deficiencies of the game. In the follow-up, I will continue to listen to the opinions of players and make a lot of updates to the game, continue to improve the framework, and add more interesting content. "One More Step" is a turn-based auto chess + roguelike game. It is also a game that emphasizes the fun of combination. Therefore, players not only need to cultivate heroes and bonds like traditional auto chess but also to rely on different combinations of equipment to achieve the Maximized output. In addition, exploration and economic systems are also the content I want to emphasize, and more content related to this will be added in the future. Combine these strategic elements and you will find that this game has a completely different kind of fun. Scheduled follow-up update plan: Awakening skill system; buff system; MOD function; List of Challengers, Hall of Fame. And more. If you have any questions or doubts about the game, or if you want to add some gameplay to the game, or exchange a game-playing experience, you can join the gaming QQ group: 60473475. Let's make it more interesting together! Gameplay  One More Step: To download this game you need to be registered as a member of NewGrounds (Free registration) Terms of use: Please keep your feedback as a feedback of players, not a feedback of developers. Developers don't really care about them. Please be a little responsible. We don't use these "Come back" on the topic for the purpose of spam. Developers are busy, and cannot really deal with your problems. Please fill out the feedback form if there are any problems, we will be glad to help you. If the problem is really urgent, or you want to be added in the Hall of Fame, then you can contact me or contact the administrator. Developers will read the feedback as a reminder. We promise to read and analyze your feedback and make a personalized response. Developers will get help in time when the feedback is a little annoying to read. Developers also get help when the feedback contains a great amount of feedback. If you need to report a feedback, we will help you as

## What's new in Air Strike:

**: We're in Preview Hell by Rob W. It's not often I have to make an editorial decision while at the same time stifle a smile. At first glance, it seems like a lot of fun. "Let's have an illmatic mashup by way of a sculp build entitled 'The Battle of Bassgod.' Of course, my buttohole got in the way." The story goes on to a couple more chapters about two co-worker drones, each passing out a different perspective on the battle of Bassgod. It was fun enough for a couple of Bulwark employees who had some free time on their hands, so I gave the story a day or so. Then I asked a trusted co-worker, Rob W., to have a little look to see if he could spot any flaws. He did! Upon hearing that the story needed more narration instead of writing and that there needed to be a bit more of a plot in order to tell the story, Rob went to work. The plot was added to enhance the rambling narration and transform it into something that can stand on its own. "I know I sorta screwed myself," he said when I heard the finished product. "But I just did this in one night. Would I tell my friends? No." I say, "Exactly! That's what's so amazing about it!" Keep in mind that while Bugadship is still in pre-alpha state, it is fully playable. That's why I've accepted his challenge to help him finish our second**

**alpha patch: turn this homecoded pirate simulator into an actual product. THE BEGINNING Where would I start a project like this? The first part of the gameplay mechanics are pretty simple, so I went with making the base ship. I didn't quite find the model I was looking for on ArtStation, so I just started working on the hull. First I made a basic bug tank. ArtStation: Bug tanks It took me about two hours to sculpt and the texture was painted in approximately two days. Once I had the layout for the build, I started designing the inspiration for the models I wanted to build in place of the bug tank. I liked the idea of a cockney blueblood for a co-worker of mine, Jared. I also liked**

Epic Tavern is a narrative-focused fantasy management-RPG where you rule the land from your Tavern. Recruit heroes, send them on quests, and reap the rewards! Build a legendary Tavern to attract Heroes from every corner of a dangerous and magical world. By bringing together courageous parties and sending them off on dangerous (and oftentimes crazy) adventures, every decision you make will alter the destiny of your Epic Tavern! **Player Choice:** In Epic Tavern, every quest choice made and every adventurer befriended could unlock new quests, new alliances, or access to characters, items, and tavern building opportunities. The experience grows as you play - your choices will directly steer the fate of your intrepid adventurers! **The Tavernmaster:** You and your tavern are at the center of a world full of danger, intrigue and unlimited adventure. Your every choice determines the future of your establishment, bringing heroes and stories together in fellowships that will become the stuff of legend. This is where friendships are made, and where great adventures are started. In Epic Tavern, you build the destiny of your world, one drink at a time. **The Adventurers:** A multitude of characters drawn from 20+ classes and walks of life will visit your tavern. Mages, warriors, assassins, and more will be at your disposal! Befriend them over drinks and learn their secrets. Between quests, take their experience, level them up, and influence the nature of their destiny. **The World:** You will send your new friends on quests to explore the land of Beor. These quests unfold into an epic storyline unique to your playthrough. Epic Tavern pushes the limits of a player-centric narrative and creates a brand new model of the classic RPG experience. The impact of your choices will inexorably change your adventurers and the World itself! **Attract Adventurers:** Build a legendary Tavern that draws the greatest heroes in the world. Befriend your patrons by loosening them up with frothy pints and hire the Adventurers whose traits you desire. **Unlock Quests:** Perk up your ears and listen for whispers and rumors to find the opportunities you'd like your Adventurers to pursue. **Track their Progress:** Follow your party on the map and see in detail how the quest is unfolding. Each encounter could yield treasure and XP, or tragedy and defeat. **Sort Out the Results:** Use what is earned to boost your Tavern's renown, level-up your victorious Heroes, and prepare for ever more treacherous quests. **Not All Challenges are**
