In 1992, the second major release of AutoCAD, version 2.0, was introduced, moving to a 32-bit architecture. This version also featured a complete rewrite of the drawing engine, the ability to read and write DXF files, and a wider range of support for UCS (Universal Coordinate System) data. This functionality was also used in the 3D drawings made in subsequent versions of AutoCAD. In 1998, AutoCAD 9 was introduced. This was the first version of AutoCAD to ship with Windows NT. "Turn Back the Page" takes its name from the title of the tenth track on Hayley Williams' solo debut, as well as the work of David Bowie. Frontwoman Hayley told NME she was a fan of Bowie's work and was also an admirer of her fellow pop star, Marilyn Manson. "I'm such a huge Bowie fan," she said. "It's funny, I just saw a documentary about him the other day, which was really cool because he had such a long, complicated life. He was really interesting and I really like his music, too. I love 'Rebel Rebel', 'Ashes To Ashes' and 'Young Americans' as well. I like his production, I like his collaborations - when he worked with Lou Reed, it was really cool, and I love 'Ziggy Stardust' and 'Let's Dance'. I've just got to a point in my life where I really appreciate him now, and I'm not sure why I didn't before. Maybe it's because I like to immerse myself in dark, psychedelic stuff. I'm a big fan of the Kinks, and that whole era was really interesting." Hayley also cited Mötley Crüe, Poison and the late Judas Priest frontman Rob Halford as people she enjoys. "He used to be on [the UK TV show] 'Who Dares Wins' with Phil Tufnell and Alan Whicker, and he's just got this really intense stare and he's very intimidating. He's really passionate about his metal, he's got this very spiky beard. I just really like to watch him onstage, and I really respect him. I've always been a Judas Priest fan." Hayley has just released her first solo single, 'She Wasn't There', and has been touring with her band The Deathcamp Dolls.
