## **What's New in the Backup Entire Drive Software?**

Backup Backup and Restore Pro is a handy program designed to help you restore deleted files and folders, as well as copy entire partitions to a separate storage device. The primary task, however, consists of copying your entire system partitions, making it particularly valuable when creating copies of your computer in case it crashes or you perform some other maintenance action, transferring it to another disk or even copying it to cloud servers. Backup and Restore Pro features a dedicated menu for configuring backup locations. By default, it provides several options, providing you with the chance to save files and folders on a local drive or external drive. Once configured, you can run the task whenever you want. To help you set up backup locations, Backup Backup and Restore Pro allows you to pick which drive it should copy to. Additionally, it can take into account the size of your backup drive or a source partition. If you wish to transfer the backup to the destination drive in real time, you will need to download the full version of Backup Backup and Restore Pro. However, the free version of the tool allows you to select either local or external drives. Furthermore, Backup Backup and Restore Pro features an advanced option, which enables you to re-size the source partition so that the source and destination have the same size, a convenient feature if you want to copy an entire partition of your hard drive or create several identical copies. It enables you to set the number of copies you want, which is particularly useful for creating backup drives. The backup is divided into two segments: data backup and file backup, which helps you easily select the files and folders you want to back up. As the trial version is limited to 20 backup locations, you will need the full version to use all the features, which include backing up to hard drives, external USB drives or even to the cloud. Once set up, you can start the backup process immediately. Backup Backup and Restore Pro will create data backup copies, indicating on screen the current amount of data copied. At the same time, it automatically backs up the file system as well, creating individual backup files on the target drive. Additionally, Backup Backup and Restore Pro does not overwrite files when it duplicates them, which helps you keep them safe. Smart enough to boot in a flash When it comes to features and functionality, Backup Backup and Restore Pro is one of the most straightforward backup applications for creating duplicates. The tool enables you to configure several backup locations, indicating the size of the backed up partitions and the number
