Elden Ring Features Key:

Myth of the Elden Ring - The story of a boy named Tarnished. It centers on the power of the Elden Ring, a ritual given to the great heroes of the past. One fateful day, Tarnished, a young boy with a frail body and an ordinary appearance was chosen to become an Elden Lord. As an Elden Lord, he sets out to stamp out the demonic forces that threaten the world.

Chaos in the Lands Between - A drama created from the pieces of the myth. The stories of the other characters who play in the Lands Between interrelate with the main character. Through these stories, we can see the view points of different people and engage in the events going on in the game world.

Fight all the Demons - Defeat the enemies within the Lands Between. You can freely battle for your freedom from the lands of the enemies in the game world. Depending on the strength of your attacks, you will encounter ever larger demons.

Cascading Weapon Skill + Magic Scroll System - Using the magic scattered throughout the game world, you can learn and develop new skills and items through the base game or other content.

High Class Act: party organization - Battle orders for the dungeons can be set by party leaderboard/ chat.

Through dialogue trees, you can organize your party to maximize your effectiveness during battle.

Revitalize the Death Sword - The Divinity Sword is in a state of suspended animation. It has not been used for 500 years. The wisdom that was passed down through the generations of the swordsmiths who forged the weapon is no more but after 1000 years of devotion from the Divine Sword, Tarnished is once again a weapon forged by the elements. Using their combined power, he gains terrible capabilities with each use as he invokes upon the Rune, the great power to protect the world.

1. Introduction to the Games The game is a Fantasy Action RPG. An action game that places a high priority on battle. The aim of the game is to defeat monsters and come into contact with powerful people that come from the Lands Between. 2. System The battle system is a hybrid between turn-based and real-time, allowing for action between turns. Movement and dodging are free, allowing for actions that are sudden and unpredictable. Battle is performed through direct combat between the player and monsters, or via combat called skills between the player and other party members. Depending on the method, the reaction time may be slow, but the impact is great. By combining the two methods, it is possible to carry out actions that would normally be impossible. The game system uses the following 3 types of Mana : Basic Mana : Mana used to activate skills. It is necessary to have a large amount of Mana to perform a skill. Spell Mana : The attack portion of a spell, a skill that allows a spell to be activated through the Mana. It can be used to deal tremendous damage, but it takes a lot of time to learn. Support Mana : A skill that gives support to a party member. It can be used to activate new skills, provide buffs or heal party members. It's a supporting skill that can change the fate of battle. There are no hard and fast rules when it comes to battle. Every battle is different and it is up to you to determine the battle's overall result. Depending on the type of battle, the turn order may change, allowing the player to perform actions at unexpected times. 3. Visual Effects 3D graphics that focus on a clearly defined 3D world are used to give you a sense of reality. The overwhelming sense of scale that the vast world provides, and the differences in details such as the various unique scenery and the various weapons and skills, are designed to give you a powerful experience. A huge 3D world with various character expressions like talking, expressions by pressing buttons, and by looking at the items in a shop. Exploration of the world. The scenery unfolds as you move through the world. Changing scenes that gradually reveal the images and details of the world. Mana Gacha, where free-to-play Mascot Dolls appear By paying for Mascot Dolls, you can obtain Dolls that will be used when connecting to the online world. At specific locations, you can obtain various trade

What's new:

Zorael

Coming to PC in 2013. Maxwell Chetwynd, the pen and paper RPG player, has returned to develop a browser based game with an open world, TARNISHED, and he's blogging as he works on that game from his house in England on the Destructoid Twitch channel!

The Destructoid article compares it to *Sword of the Stars* which has a surprise layover from 2012.

***TARNISHED* will be a mixture of traditional role-playing games and online pass games, Zorael, who programmed Maxwell's current project has weighed in. He says the game will be in development for PC/Mac and Xbox Live Arcade. There will be functionality in that it can be played from either a single client or in servers. In the latter case, players will get split into two factions (for unknown reasons, three's a crowd). A multiplayer component is indicated, but no information on a full playing field has been released.**

[Anti-spoiler, but from the comments we should expect a story teller in Zorael as there's a sample of a character class even though he hasn't revealed all the class details. After all it is from Max's pen and paper game.]

The story is told from three characters, Dawn, who is a young elf;

Bruno, an orphaned dwarven survivor; and Zofia, a female human mage. No doubt Z
