Easter eggs Blood Eagle is just a double meaning name, his name means that in German it means both 'tiger' and 'eggs'. I went to his island early and collected lots of bird eggs while playing on my way to Yan'a who you have to destroy at the beginning of the game. It's not only a secret character but also a very useful unit. I think it can be a good strategy in general to build tons of bird eggs and later on dragons, because they can destroy your opponent very fast, even when they're on the same map. You can use them to attack and then retreat, so it can be a good idea. Blood Eagle - an egg! Tiger Canyon - a little secret island, it only contains the various alts of Nak, first of all all his alts. The complete story is that he wanted to build a road in the world and did this by driving his airplanes into mountains to cause an earthquake, which caused a huge hill to rise up. After the game's opening animation he stopped here. But he's not in any order. Therefore he shows up at the beginning of the world map, after that you start with him at the top of the hill. He's

---

actually in that order as you progress through the world map. His guide is more a story than a map, but it's still fun to read the text and see who he's gonna do next. Xeoni - Chieftant Chief of the Water Tribe and First GuyOfWater Tribe - his base! Go back to get to him - choose your character again and this time press on, he might not have respawned yet. Water Tribe - Follow the guide - you'll find it at the end of the introduction. Inner Lake - A lot of people told me there was a boss in this area, but there was nothing special. There are some weapons and like 5 alt's of Orestes sitting around. I heard there are some flying reptillians there, too. So the guide is just a hint. And a nice story to tell your friends about :3 Priceless Slave - Beside the golden spear of Arad, he also found a book which tells him how to unlock this mode. It's a cheat, obviously. Slaves are located just above the spear - You can climb the poles, then run behind the tree (to the left) and it's the 1st one. If you can't find it right away, go back to the spear and
