Religion: Earth's Primal Condition "Religion is for those who fear death. For those who do not, for them it is a crime, nothing else matters." (St. Tauler, Trauerwald) Whether in times long past or in today's modern society, where many of our roots are lost or even questioned, what we consider "religion" is a relationship of trust, faith, and responsibility. To symbolize how deep the roots of this word reach in humans, the Edda throws us back to the nature of life: religion is first, and foremost, an Earthly condition. It cannot exist without consideration of the Earth, of living beings' attachment to it, and of its beauty. Therefore, the Edda includes a wide range of themes from spirituality and bioethics to world religions and myths from all over the world. The eight scenarios are presented by an array of unique figures such as an Indian hermit, a Russian mason, a German anthropologist, a Chinese musician, a Swiss priest, a US cult leader, and many others. The scenarios build around well-known topics from Indian philosophy and Chinese history. If you know your world history, you know the India sections, if you know Indian philosophy, you know the India sections, if you know about the life of Buddha, the life of Jesus, you know the Christian sections, if you know the Parsi religion, the Judaism sections, and so on. This section contains lots of background information about those religions and of all religions in general. The scenarios will be always accessible without having to read anything. If you are a Christian, Hindu, Buddhist, Muslim, or any other religion that has its own scripture or holy texts, you are able to read them as you like and to understand the storyline. You may also ignore the storyline and play just for fun. It is not a strict game, you won't be punished for your choice. But even though it won't feel like a religious game, it still has a moral game play. The scenarios that do not follow a storyline will still offer you the option to follow your own path - you will never be obligated to make any choices in those parts. The scenarios are different from each other in many ways. They feature different characters and settings, they have different storyline to follow, but mostly they have a different meaning and a different goal. Some scenarios will lead the player to the altar of God, some to the c9d1549cdd

There is little information regarding the relation between maternal LC treatment during gestation and offspring PTH levels.\[[@ref11]\]** **Although, weaning increase in 24 h urinary calcium, it was not statistically significant. This suggests that the maternal nutrition may not be altered in the pelage rats under test in this study.
