Q: setting file Permissions for all sub folders and sub files of a folder using RoboCopy I have a folder named as - "Z:\folder1" I have created some file and folders in that folder. Then I have created a file named as Permission.txt under the folder - "Z:\folder1" Now I want to set the permission on all the files and sub folders of "folder1" for all users. I did this but it has not worked. robocopy Z:\folder1\ Permission.txt /MIR What I want to do is, I want to copy the permission.txt with sub folders and sub files recursively by using robocopy, Why is it not working? Thanks A: You can use Xcopy instead, it is doing the same thing as robocopy and it is easier to use XCOPY E:\localhost\test\Test\testfile.txt D:\Foldr\info\ 1. Field of the Invention The present invention is related to a method of processing imaging data, and more particularly, to a method of processing various types of

personal imaging data. 2. Description of the Prior Art Currently, there are many data processing methods which are used for data processing, which are mainly used to view the human face. In general, the method of processing the human face is divided into two types. One type of the method is based on image processing, the other type is based on data processing. The image processing method has its pros and cons, but its main purpose is to enlarge the image. Hence, it consumes a lot of computing power and processing time. Although the method can obtain a clear image after many calculations, it still has problems such as color distortion and image blurring, which makes the images look like printed pictures. Therefore, the image processing method cannot be used to view the human face. The data processing method has its pros and cons, but its main purpose is to view the human face. It can view the human face clearly after many calculations and is able to save the data of the human face. In other words, it does not need much computing power and processing time to display the human face. It can also save the data of the human face, such as pictures, documents, etc. However, the data processing method is not designed to be used to process images
