installation program. . The
HP Audio Control Panel is a
free, easy to use and

convenient solution for creating your own custom audio experience. Its fast and easy to use, yet gives you complete audio control. . On the control panel's main page you can adjust settings related to your audio system such as for example bass, treble, volume, and brightness. It also provides options for muting and unmuting both your built in speakers as well as headphones. . For example, you can mutata the bass, adjust the balance between

the highs and lows, and even adjust the loudness. The bass can also be turned off completely so you can enjoy music without the powerful bass. Sound quality can be adjusted using the treble and mid frequencies. All settings are saved and you can load a preset profile to use them. .
