I have a Docker and a Docker Compose in one project. My Docker Run is the following: `docker-compose build docker-compose up --build -d` While I have an error in some of my templates. So when I have `{{ $employee->email }}` in a template I got the error: Declaration of `App\Http\Controllers\EmployeeController::edit()` should be compatible with `Illuminate\Http\Request::Illuminate\Http\Request($name, $format = null)` The template is working just fine if I have `{{}}`. I have my composer.json file configured with the following: "autoload": { "classmap": [ "database" ], "psr-4": { "App\\": "app/" } } This is my AppServiceProvider file (located in `app/Providers/AppServiceProvider.php`): `6d1f23a050`
