Flat Solution Explorer is a non-hierarchical solution explorer addin that combines filtering, search and project management. The addin displays a flat view of all projects, references, solutions, and other Visual Studio items in the current project, solution or selected project. Real time filtering of items is possible. Each item can be moved, renamed or deleted. The Flat Solution Explorer is a great tool for managing large solutions. The solution explorer automatically resizes itself to show all items so that large solutions can be easily viewed. The Flat Solution Explorer allows the user to work with a hierarchical view of items on disk or hierarchical view of items in solution projects. In a well attended meeting, 30 people representing some of Canada's most successful real estate technology companies took time out of their busy schedules to share some of the latest developments in the world of real estate software and how they are being applied. The conference was facilitated by Jack Pedlar, President of Kingsboro Properties and Ottawa's leading provider of real estate services and information technology. Over the course of two days, people learned how they can use their Internet, phone and mobile devices to make their life easier, from search and market analytics to data feeds and mobile real estate sites. The Ottawa Real Estate Technology Conference, hosted by Kingsboro Properties, is an annual event bringing together the key technology professionals in the Ottawa real estate community. This year's conference was held July 22 - 24 at the Crystal Ballroom at the Fairmont Chateau Laurier. Jack Pedlar, President of Kingsboro Properties and Canada's leading provider of real estate services and information technology, provided the conference's keynote address. In his opening remarks, Pedlar discussed the challenge that most real estate organizations face in keeping track of the web of sales information. He pointed out that the real estate industry has a "self-serving" attitude, whereby each real estate agent in the field (salesperson) cares only for her own work, and not necessarily for the entire organization. "If every salesperson has their own data on his or her desk and is selling with that data, it's easy to manipulate it for their own interests," said Pedlar. "When this happens, the real estate organization doesn't know who to be concerned with: the true customer or the salesperson." In a world where social media, mobile devices and the Internet are a key part of everyone's day-to-day routine, Pedlar discussed the role of technology in a seamless real estate experience. "Technology is a tool that needs to be used correctly and in the right way in order to be successful. The reality is, if you don't use the technology effectively in the real estate industry, the
