Toxic effects of aldicarb and malathion on the earthworm *Lumbricus terrestris*. Effects of aldicarb, malathion and aldicarb+malathion were evaluated on the soil-borne oribatid mite *Lumbricus terrestris* by measuring its weight gain, size of spore produced, fecundity and percentage egg hatch. The order of toxicity was aldicarb>aldicarb+malathion>malathion. Although the weight gain was inhibited by aldicarb, malathion and aldicarb+malathion, only malathion and aldicarb+malathion produced spore. Malathion decreased the fecundity and aldicarb increased it. Aldicarb and malathion decreased the hatching ability of egg. Aldicarb is more toxic to *L. terrestris* compared to malathion at all tested concentrations, while aldicarb+malathion is more toxic to it than the sum of toxicities of aldicarb and malathion. Gastrointestinal disease in liver transplant recipients: radiologic findings. In the posttransplant period, patients are at increased risk of gastrointestinal (GI) symptoms, although less than in the general population. Although a systematic approach to GI complaints in this patient population has not been standardized, GI examinations are indicated in the posttransplant period to monitor for and prevent or treat upper and lower GI disease. Radiologic imaging plays a crucial role in the evaluation of GI disease. This pictorial essay summarizes the radiologic manifestations of GI disease, specifically upper and lower GI disease, in liver transplant recipients. Menu Page Tools The Graham of Constitution Hill Part two of our special two part series on the Fairbairn family The Old Shire of Beechworth lies on the Victorian border of New South Wales. It's a region steeped in history with a full and rich cultural foundation. It's a country that breeds family values, and a community that clings to its past. Its heady history is told in buildings rich with heritage, built for more than a century, continuing to be appreciated as a vital landmark in e79caf774b
