What's New In?

Intended for both System Admins and regular users, Prominent PC Scan is a powerful tool for locating computers on a network, discovering which ports are open, locating active hosts, discovering which machines have shared resources, and locating computers that are available over the internet. This version is designed for use on the "Big Iron" variety of network equipment, however, it is most likely that smaller offices can also benefit from it, as it is very easy to set up and use, even if you do not have a dedicated help desk. As with all of my programs, this one can be used for free as long as you wish. However, with the full version there are some additional features which include: The ability to auto-detect your external IP range and workable internet connections The ability to automatically locate IPs of your favorite blogs The ability to update your WAN and internal network IP addresses automatically and keep them up-to-date The ability to set up a simple web site where you can access the program remotely. The ability to automatically locate new computers on your local network The ability to auto-locate any computers that are connected to your network. ... and much more Download Prominent Pro PC Scan and test it to fully assesss its capabilities! Currently Prominent PC Scan allows you to use it free of charge, and the program comes with a 30 day trial period. However, you can upgrade to the full version for only $20 by purchasing the link that is provided above. This will include all the features listed above, as well as allowing you to add any external IP addresses that you wish. As well, all the upgrades are listed above the download button for those who wish to upgrade. As with all of my programs, this one can be used for free as long as you wish. However, with the full version there are some additional features which include: An upgraded UI You can view which programs are running in the background. You can run multiple scans in one instance. You can export reports to HTML format, as well as other formats if you wish. While I am still in the testing phase, I am hoping that all of you will give me your feedback as to what works, what doesn't, what you would like added, or even new features you would like to see. I can't promise that I will have every single request, but I will do my best to make it happen. As well, if you do not find a particular function, please let me know. I am hoping to get a major version out this summer, and I will need your help in identifying the next version. However, if you have suggestions for features that you wish to see, please let me know. If you have any questions, comments, or concerns, feel free to leave
